

MATCHMAKING EVENT WITH EUROPEAN CLEANTECH COMPANIES

NEW YORK CITY - 7 & 8 MAY 2018

MEET EUROPEAN CLEANTECH SMEs

European cleantech companies are heading to New York City in conjunction with the Smart Cities Conference on 7-10 May 2018.

The European Cleantech Internationalisation Initiative (EC2I) is organising matchmaking events to match European SMEs with American organisations.

The EC2I partnership is pleased to invite you to meet innovative European companies.

Our matchmaking event will take place on 7 - 8 May 2018 in New York City. Participation is free of charge and will give you the opportunity to:

- Present your organisation and challenges.
- Take part in B2B meetings with European SMEs matching your needs and interests.
- Interact with other European cleantech organisations during networking events.

OUR COMPANIES

Our companies can provide cleantech solutions within the following areas:

- Smart City & Digitalization
- Green Energy, Energy Efficiency & Smart Grids
- Waste Management & Recycling
- Resource Management (Water, Air, Soil)

The following organizations have expressed their interest in joining the matchmaking event:

DiniTech GmbH, Jagerberg, Austria.

DiniTech GmbH developed NRGkick, an electric car charger that allows to charge an electric car at any standard wall outlet with up to 22 kW charging power. The NRGkick can charge an electric car ten times faster than the standard 3-phase power sockets allows.

Cenaero, Charleroi, Belgium.

Cenaero is an applied research center providing to companies involved in a technology innovation process high fidelity numerical simulation methods and tools to design more competitive products. Mainly active in Aeronautics, Cenaero is also involved in surface transport, energy, health and sustainable development.

Infopole Cluster TIC, Namur, Belgium.

Infopole Cluster TIC is the business cluster that brings together and unites professionals from information and Communication Technologies (ICT) in order to promote business innovation through partnership. Through its network of more than 130 companies, Infopole can help companies to find the ideal partner whatever its IT project.

Leapcraft, Copenhagen, Denmark

Leapcraft is a globally operating provider of innovative solutions at the intersection of design, big data and technology. Their core competence is to transform high complexity into intuitively applicable and appealing solutions through a combined user-centric approach. Leapcraft would be pleased to meet municipalities, facility operators and real estate developers.

Nabto, Aarhus, Denmark.

Nabto provides a full communication infrastructure to allow real-time direct, encrypted communication between end-user clients (tablets, smartphones, PC) and resource limited devices (< 1kb RAM and up) - the Nabto communication platform. Nabto would be pleased to meet electricity, security or home automation companies.

Liqtech, Ballerup, Denmark.

Liqtech is the leader in the development, manufacturing and supply of revolutionary silicon carbide ceramic technology, including nano filtering membranes, for the purification of liquids and gasses. Liqtech would be pleased to meet water utility companies or marine based industries.

Innenco, Malmö, Sweden.

Innenco is an innovative energy concept that increases energy efficiency with more than 70 % compared to traditional energy systems. Innenco provides solutions for new building constructions and guarantees great comfort, low energy use, sustainable investment costs with precision from life cycle cost and profit. Innenco would be pleased to meet commercial, industrial and residential real estate developers, managers or owners.

Orbital Systems, Malmö, Sweden.

Orbital Systems is the global leader in domestic water savings. In the company's first product, the Shower, the water is purified and recycled by Space Certified Technology, enabling up to 90% savings of water and energy. Orbital Systems would be pleased to meet Hotels, swimming facilities and real estate developers.

WANT TO JOIN?

If you are interested in our matchmaking event:

- Please identify the challenges, areas or companies you are most interested in.
- We will schedule B2B meetings with relevant European Cleantech SMEs for the 7 - 8 May 2018.
